Data & Analytic Use Case

Private & Confidential

GGF GREAT GIANT FOODS

Use Cases Scenario and Expectation

Scenario

GGF launched a new business in 2022, focused on crafting an exquisite selection of beverages designed to redefine the customer drinking experience. Now, GGF management is eager to expand this venture by opening new branches and attracting more customers to boost revenue.

However, the management remains **uncertain whether the current business is genuinely profitable and worth expanding or if there are areas requiring improvement before proceeding with branch expansions**.

Task

You are expected to **perform a comprehensive analysis of the provided datasets to uncover valuable insights, present actionable recommendations**, and effectively communicate the analysis results to top management.

The objective is **to evaluate whether the current sales performance indicates strong potential for growth and sustainability** or t**o identify areas requiring optimization** to ensure the long-term success of the business.

Output Expectation

Data Analysis Steps:
- Clear documentation of data analysis processes, including data modeling activities.

Analysis of Current Sales Performance:
- Evaluate sales performance to identify potential problems and opportunities for improvement.
- Identify and analyze data patterns based on the provided datasets and personal assumptions.
- Highlight any anomalies or unusual behaviors in the sales data and provide insights.

Profit and Loss Analysis:
- Use the predefined profit and loss calculations in the dataset to assess business sustainability.
- Identify potential cost-reduction opportunities and propose solutions to improve business viability.
- Highlight and analyze data patterns based on given data and personal assumptions, focusing on anomalies and behavioral trends.

Predictive Analysis:
- Explore opportunities to incorporate predictive analysis into this task. Determine how predictive models or techniques can be applied to uncover trends, forecast future performance, and support actionable recommendations.
- Use these forecasts to support recommendations on business expansion and sustainability.

Deliverables Guidance's

1. The datasets required for this task will be provided to you in .xlsx format along with the task instructions. **You are encouraged to extract as many insights as possible**, provided they remain aligned with the main objective of the analysis.

2. We want to **ensure and identify that you have basic proficiency in using BI tools**. The utilization of BI tools for data analysis and visualization is **mandatory** as part of this task.

3. You are free to use any BI tools that suit your preferences to complete the task. However, we recommend using one of the following since its accessible and free to use:
    - Power BI
    - Tableau Public
    - Python (for data analysis and visualization purposes)
    - Streamlit

4. While your ability to visualize data is important, it is **secondary to the quality and depth of your analysis**. BI tools should be utilized as supporting tools to enhance and provide the audience with a clearer understanding of your analysis.

5. Given the expectation outlined in point 4, you are required **to compile all your analysis and data visualizations into a slide presentation**. This will ensure your findings are effectively communicated and easy to understand.

6. A structured approach to analysis is crucial. **Begin with a concise summary of your findings, followed by a detailed breakdown** of the analysis to provide deeper insights.

7. **Be creative and think outside the box to uncover meaningful insights** and identify potential solutions within the datasets. Your ability to approach the analysis innovatively will add significant value to this task.

8. You **may use assumptions to support and highlight your analysis**. However, ensure that your assumptions are clearly stated and easy for the audience to understand, providing context for your perspective.

9. **Luck plays an insignificant role** in the success of this task—your hard work and dedication are the keys to achieving great results. We look forward to seeing your outstanding deliverables!

Thank You
